

MuniciPAL_ReadME

Build:

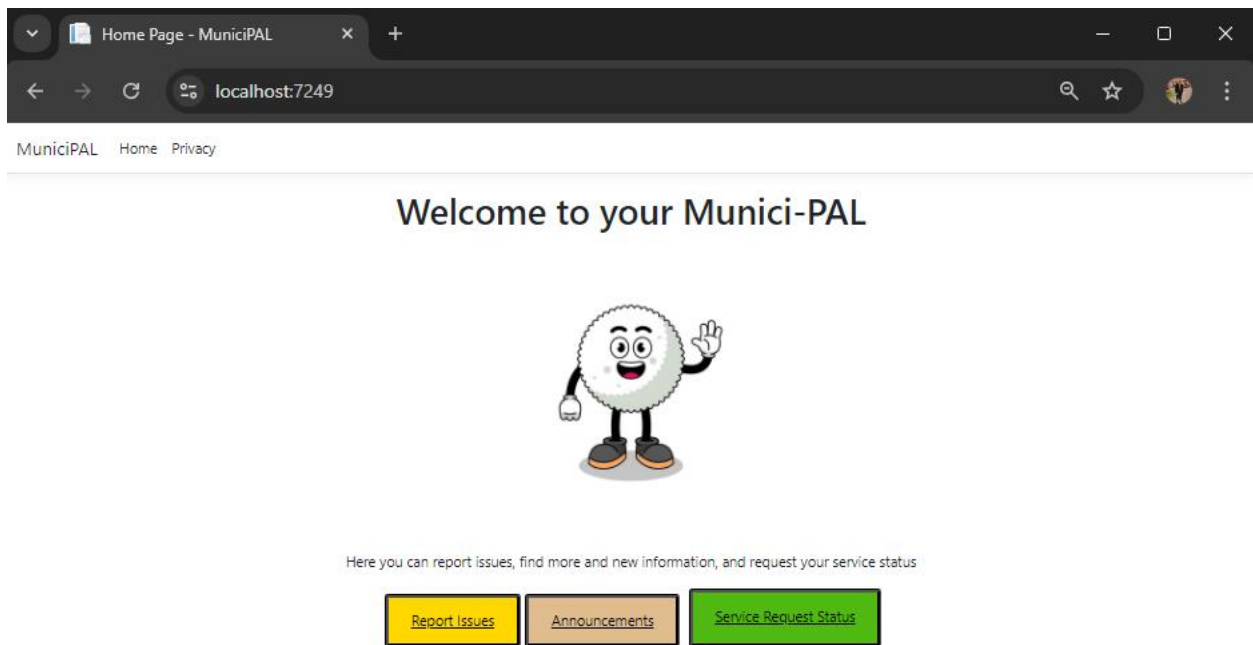

Copy GitHub Repository link and Clone application.

Run:

On start, user is prompted with three colour coded options:

Report Issues, **Announcements** and **Service Request Status.**

As of this commit, only the Report Issues option has functionality. The other two will have content implemented through out the lifecycle of this application.

Once **Report Issues** has been opened: user is required to fill-out of $\frac{3}{4}$ prompts.

The Location of the issue being reported, the Category of the Issue and the Description of the Issue are all requirements. The attachments are optional. The form will not be submitted if neither of these three are filled.

Report Issues

Enter the Location of Issue

Select the Category of  Please fill out this field.

Pot Holes

Enter the Description of Issue

Attach ALL Supporting Documents (.pdf; .docx; .xlsx; .mp4; .mp3; etc)

Choose Files No file chosen
